## ISC 20C 2024-2026 Bureau Elections

12 May 2023

### Members of the ICOMOS International Scientific Committee on 20<sup>th</sup> Century Heritage

It is with great pleasure that I announce the results of the election of the new 2024-2026 ISC 20C Bureau. After a duly conducted nomination process and period and the receipt of nominations from expert members the following are your leaders for the next triennial.

- **Susan Macdonald**, President (AUS/USA)
- **Grethe Pontoppidan**, Vice President/Co-President (DEN)
- **Stefania Landi**, Secretary General (ITA)
- **Sheridan Burke**, Vice President/Co-Secretary General (AUS)
- **Kyle Normandin**, Treasurer (USA)
- **Ho Weng Hin**, Vice President (SNG)
- **Silvio Oksman**, Vice President (BRA)
- **Enrique Madia**, Vice President (ARG)
- **Dumitru Rusu**, Vice President (ROM)
- **Sangeeta Bagga**, Membership Director (IND)

The ISC 20C is fortunate to have such an experienced, capable, and committed Bureau for the coming three years.

There was no formal voting by designated National Committee ISC 20C members as prescribed in the ISC 20C By-Laws. The call for nominations produced the slate of nominees, new bureau members, identified above. There was one nominee for each Bureau position. Thus, all nominees were expertly qualified and unopposed. Formal voting was unnecessary.

The President and Secretary General positions are identified as shared. ISC 20C Bureau responsibilities and associated work of the President and Secretary General are significant. Sharing the workload and leadership required of these positions will enhance Bureau productivity while expanding the future leadership resources of the ISC 20C, a win/win.

The new Bureau's term starts with the ISC 20C Annual General Meeting in Sydney on 1 September 2023. You will be hearing soon about new ISC 20c initiatives and the 2024-2026 Triennial Plan. These are challenging times, socially, economically, and environmentally. Conserving the fabric of 20<sup>th</sup> century heritage and engaging with the existential issues associated with it are of paramount importance. The ISC 20C can, and I believe will, make a meaningful contribution to preserving 20<sup>th</sup> century heritage in a manner that contributes positively to a more equitable, healthy, and enriched future.

Sincerely

Jack Pyburn, FAIA, President  
ICOMOS ISC 20C/ '21-'23
